ATS and HR report

Sébastien Barbier

Company: Example AG
Role: Senior Frontend Engineer
CV file: sebastien_barbier_resume.pdf
Report date: 27 February 2026
CV language: English
Final round: 2

Legend

MATCH: keyword clearly present on the CV

PARTIAL MATCH: implied but not explicit

MISSING: important in the ad but absent or not supportable

Match score by round

Round	Match %	Notes
1	62%	First pass before skills line update
2	78%	Added explicit React and microfrontend terms
3	n/a	Not required; stopped after round 2

Keyword match (final round)

Status	Keyword	Notes
MATCH	React	Shellui and Unique bullets; skills section
MATCH	TypeScript	Summary, Shellui, skills
MATCH	Microfrontends	Summary, SAP bullet, skills
PARTIAL MATCH	GraphQL	Not named; REST APIs only on CV
MISSING	Vue.js	Required in demo ad; not in master experience

ATS screening verdict: Borderline pass
CV is two pages, text-selectable, and title matches senior frontend scope. Several ad terms appear only once; partial rows may score low in strict ATS parsers.

HR check verdict: Pass
Swiss header includes permit and languages. Experience is recent and relevant; tone is factual. Minor gap on one ad keyword documented below.

Line manager view
A hiring manager will skim Staff-level Shellui work, Unique financial services frontend, and SAP microfrontend lead first. Top concerns: verify depth on any stack listed only as partial match, and confirm German on the job if the team is Zürich German-speaking.

Gaps to address in interview

- **Example keyword not on CV:** If the ad requires a tool not in master data, explain adjacent experience in interview only; do not add to the CV without proof.
