Sébastien Barbier

Senior Software Engineer | Frontend Architecture & Full-Stack Development

contact@sebastienbarbier.com | xxxxxxxxx | sebastienbarbier.com

8005 Zurich, Switzerland | B permit (EU/EFTA)

Software engineer with 16+ years of experience spanning frontend leadership, distributed systems, and end-to-end product development. Former Staff Frontend Engineer at Unique and Associate Development Architect at SAP, with experience in financial services, healthcare, and open-source products.

Professional Experience

Staff Frontend Engineer Dec 2023 - Dec 2025

Unique AG *Zurich, Switzerland / Remote*

- Led frontend engineering for an agentic AI chat platform serving the financial services sector.
- Used retrieval-augmented generation (RAG) and Model Context Protocol (MCP) to support context-aware client interactions and compliance requirements.

Full-stack Software Engineer Aug 2021 - Nov 2023

Self-employed *Zurich, Switzerland / Remote*

- Developed Seven23.io and FromEdwin.com as a full-time solo entrepreneur, taking responsibility for the full product lifecycle.
- Owned architecture, frontend and backend development, infrastructure, CI/CD, and delivery.
- Crypto Liquidity Provider (Oct 2021 - Jul 2023): provided liquidity across decentralized finance (DeFi) markets and explored emerging protocols and infrastructure.

Associate Development Architect Nov 2020 - Jul 2021

SAP *Zurich, Switzerland / Remote*

- Helped design and implement the Field Service Management (FSM) extensibility concept: a distributed protocol enabling secure third-party integrations.
- Led architecture decisions, mentored developers, and supported scalable, high-quality product delivery.

Senior Developer / Technical Lead Feb 2020 - Oct 2020

SAP *Zurich, Switzerland / Remote*

- Supported FSM's migration to a microfrontend architecture as technical lead, contributing to the application's modernization and scalability.

Web Technologies Consultant and Freelancer Sep 2016 - Jan 2020

Self-employed *Chiang Mai, Thailand / Remote*

- Delivered web projects for clients including Chefclub, Mozilla, and Mila AG, spanning chatbots, progressive web apps, browser extensions, React Native apps, and web integrations.

Front-end Developer / Technical Lead Jun 2014 - Aug 2016

Fluance AG *Solothurn, Switzerland*

- Led frontend development in a four-person team building a cross-platform HL7 patient data interface with jQuery, AngularJS, and FoundationCSS.
- Managed documentation, testing, and deployment within a Scrum development process.

Earlier Experience

Java Developer Sep 2012 - Jun 2014
Covalia *Besançon, France*

- Maintained Java libraries and real-time HL7/DICOM interoperability for the Covotem telemedicine platform; supported deployment, customers, and ISO 13485 compliance.

Part-time Lecturer Sep 2011 and Sep 2012
University of Franche-Comté *France*

- Delivered 98 hours of practical Java and HTML/CSS instruction to third-year engineering students at ISIFC and UFR ST across two five-month contracts.

Co-founder and Full-stack Developer Jul 2009 - Jun 2012
Ionyse *Besançon, France*

- Co-founded a web agency during my master's; built websites and applications with a custom Python/Django CMS and pixel-perfect HTML5, CSS3, and jQuery interfaces.

Selected Projects

Shellui 2026 - Present
TypeScript, React, Django *shellui.com*

- Open-source microfrontend shell with shared navigation, authentication, storage, and administration, enabling teams to focus on application development.

Seven23 2011 - Present
React, Django, Material UI, Next.js *seven23.io*

- Open-source personal budgeting app for manual expense tracking, with end-to-end encryption, a progressive web app frontend, and a Django REST backend.

Technical Skills

Frontend & Web Platform

TypeScript, JavaScript, React, Angular, Redux, GraphQL, Next.js, Tailwind, PWA, Web/Service Workers, IndexedDB, accessibility, UX/UI.

Backend & Architecture

Python, Java, Django, FastAPI, REST APIs, SSO, system design, distributed systems, microservices, microfrontends, Celery, RabbitMQ.

Delivery & Quality

CI/CD, Docker, Cypress, unit and E2E testing, Prometheus, Grafana, Loki, server administration.

Education

Master's in Computer Science 2011
Distributed Systems and Networks, University of Franche-Comté, France

Bachelor's in Computer Science 2009
University of Franche-Comté, France

Final Year in Computer Science - Erasmus 2008
University of Portsmouth, England

Higher National Certificate in Computer Science 2007
IUT of Belfort, France

Languages

French: Native | English: Fluent | German: B1
